### IMPORTANT

- During the rainy season (*usually Nov - Mar*), road conditions must be checked with Natural Selection first, to confirm whether self-drive access is possible or not.
- All self-drive guests need to be experienced and confident drivers, travelling with the necessary spares and 4x4 vehicles with high ground clearance – there is thick sand, deep mud (during the rainy season) and occasionally, water crossings.
- Fuel is not available for purchase at our camps. Guests must ensure they carry enough fuel with them for their trip. Maun and Kasane are the closest locations with fuel stations.
- It is important that guests follow the directions we provide and not try to follow Google Maps.
- We suggest that the guest arranges a Bemobile simcard, as this has some coverage through the villages, and shares the number with Reservations to pass on to Operations.
- We highly recommend that guests do not leave Maun after 12h00 in the afternoon, so they can travel in daylight.
